

Magpie Mediations — Project Plan

Version 1.0 · Last updated 2026-05-05

What We're Building

A web platform that connects parties in civil litigation with vetted, currently-practicing mediators. Counsel can browse a verified roster, choose a mediator, book a half-day or full-day session (online or in-person), execute the required agreements electronically, and pay a flat rate — all in a single online flow. **Our differentiator: every mediator on the roster is an actively-practicing civil litigator, not a retired judge or career mediator.**

How We're Building It

- **Modern, scalable web technology** so the platform can grow without re-architecting.
- **Established third-party providers** handle the sensitive functions: **Stripe** (payments), **Dropbox Sign** (e-signatures), **Zoom** (video conferencing), **Clerk** (accounts & login), **Resend** (email).
- **Hosted on AWS** for enterprise-grade security and availability.
- **Guided by a written "constitution" of non-negotiable principles**, including: confidentiality by default, "platform — not a law firm" positioning, mediator verification before any booking, audit trails on every transaction, and disciplined scope (no feature creep on the MVP).

Progress

Status	Milestone
DONE	Product concept and design mockup finalized
DONE	Project framework and quality standards established (constitution v1.2.0)
DONE	Technology stack selected and locked in
IN PROGRESS	First feature build: mediator roster (browse and filter)
PLANNED	Booking flow (case info, mediator selection, session type, scheduling)
PLANNED	E-signature flow for mediation agreement and confidentiality provisions
PLANNED	Payment processing and confirmation
PLANNED	User dashboards (counsel + mediator views)
PLANNED	Mediator application and verification workflow
PLANNED	Marketing pages, pricing page, public launch

What's Next (Near Term)

Build and demonstrate the mediator roster page — counsel can search by practice area, state, and availability. After that: the end-to-end booking and payment flow, then the e-signature and dashboard work.

Open Items / Decisions for the Partners

- **Pricing** — current placeholders are \$1,500 (half-day) and \$2,500 (full-day) for parties; \$1,200 / \$2,000 mediator payouts. Final pricing to be set before launch.
- **AWS account** — MVP will deploy in Morgan's personal AWS account; production will migrate to a dedicated Magpie Mediations AWS account once it is provisioned. Migration plan is documented and scoped.
- **Founding mediator outreach** — not started; will rely on the partners' professional network for the first cohort.
- **Domain registration** — to be confirmed (`magpie-mediations.com` or alternative).
- **Entity formalities** — confirm Magpie Mediations LLC formation, EIN, business bank account, and Stripe onboarding documentation are in hand before payment processing goes live.

Magpie Mediations LLC is a technology platform, not a law firm, and does not provide legal advice. Rates and features described are subject to change prior to launch.
